

1. COVER PAGE:

CPSC 304 Project Cover Page

Milestone #: 3

Date: March 7th, 2025

Group Number: 8

Name	Student Number	CS Alias (Userid)	Preferred E-mail Address
Brian Lee	57421042	p7b3b	leebrian1239@gmail.com
Devon Wu	34556357	d0o2e	devonwu40@gmail.com
Sam Zhuang	55113682	p4q1k	mr.samzhuang@gmail.com

By typing our names and student numbers in the above table, we certify that the work in the attached assignment was performed solely by those whose names and student IDs are included above. (In the case of Project Milestone 0, the main purpose of this page is for you to let us know your e-mail address, and then let us assign you to a TA for your project supervisor.)

In addition, we indicate that we are fully aware of the rules and consequences of plagiarism, as set forth by the Department of Computer Science and the University of British Columbia

2. The goal of the application is to allow users to have easy access to important information relevant to a particular stock or index fund. The database will allow users to view stocks, index funds, or ETFs that are being traded on a sample market. The database will have up to date information on these stocks including trading value, volume, market cap, relevant news, and financial reports.
3. Timeline (Milestone 4 due april 2); dates listed are the latest deadlines for each task, though it is preferred to be finished each task ahead of time. Each name represents the main lead for that task while other group members are encouraged to help and collaborate.
 - a. Make sure everyone can work on the project via git (March 14)
 - i. Additionally, make sure everyone has had a chance to briefly look through the sample code base, the requirements for each of the todos, and has an idea of what/how each task is to be completed.
 - b. Insert (March 21 - Sam)
 - c. Update (March 21- Devon)
 - d. Delete (March 21 - Brian)
 - e. Selection (March 24 - Sam)
 - f. Projection (March 24 - Devon)
 - g. Join (March 24 - Brian)
 - h. Aggregation with GROUP BY (March 27 - Sam)
 - i. Aggregation with HAVING (March 27 - Devon)
 - j. Nested Aggregation with GROUP BY (March 27 - Brian)
 - k. GUI (March 30st - Sam, Devon, Brian)
 - i. The GUI deadline is a placeholder; the GUI will be worked on throughout the project timeline and user testing for each todo will require a functional GUI.
 - l. Error handling and sanitization (March 30 - Sam, Devon, Brian)
4. Deliverables from milestones 1 and 2 have been added to the github repo.
5. Each member has successfully made a commit to the repo.
6. Still using JavaScript/Oracle
